

I am completely opposed to NAB trying to control the freedom of the first Amendment. I have enjoyed listening and being apart of the XM community for 2 years now. The music stations are much more enjoyable to listen to than FM radio and the information channels are very valuable to any subscriber. I pay for my subscription every month and do not feel that it should be limited in any way. The FCC should reject NAB's petition and let we the people have what we demand and deserve in radio programming.
